I'm pretty sure that that 3.1 dim matches with a part that goes over top of the end of that part you are referring to. I'm concerned that it won't fit properly if we let it go that big?

The hole dims are not a huge concern to me.

HS

To: Harvey Siemens
Subject: RE: fuel return cavity

I was speaking with Kevin, and he says that it doesn't interfere with anything. I've just needed your approval on it. I'll be attaching this email to the work order conforming these deviation.

From: Harvey Siemens
Sent: Thursday, June 04, 2015 2:13 PM
To: Patrick Duval
Subject: RE: fuel return cavity

Pat,

Does this part (with its deviations) fit with the next part in the system? That would be my biggest concern.

HS

From: Patrick Duval
Sent: June-04-15 11:41 AM
To: Harvey Siemens
Cc: Chris Provencal; Patrick Smith; Kevin Cadieux
Subject: fuel return cavity

Hi Harvey,

I wanted to know if you allow some deviations on some dimension of 41228-301-063-002.

- 1.733 is 1.800
- 1.125 is 1.160
- .675 is .915
- 2.93 is 3.180

I've attach the drawing to help you clear out the dimension. Please let me know as soon as possible on what action we need to do.

Thank you.
